

Activate ERP functionalities directly from **SuperOffice**

## ERP Jump

For SuperOffice CRM

### Activation of the most used functions in the ERP system directly from SuperOffice CRM

ERP Jump provides the facility to jump directly from SuperOffice CRM to the most used functions in the ERP System. This is achieved by clicking on the installed buttons in SuperOffice CRM.

Together with the link we deliver standard scripts for customer and order creation, directly from SuperOffice CRM.

These scripts can easily be modified to show contact information, purchase lines etc.

The buttons created in SuperOffice CRM provides direct access to the right place in the ERP System.

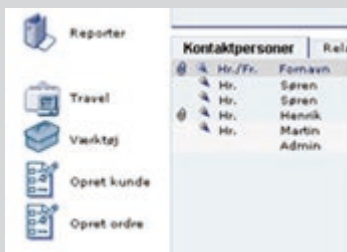

#### Create the buttons you need

The solution allows you to create as many different buttons as needed to perform a large variety of tasks. A button in SuperOffice CRM may, for example, be named 'Create order'. This button will, when activated, automatically take you to the right menu in the ERP System – ready to create a new order.

You can also create a button called 'Create customer'. This button will, when activated, automatically take you and the customer information from SuperOffice CRM customer card to the right menu in the ERP System – ready to create the new customer

#### System requirements

SuperOffice CRM 5.0.60.130 or higher. Jeeves Enterprise version 7.x or higher. Minimum XAL version 2.60, Financials version 2.6, Axapta version 1.5, C5 version 1.60 and Attain version 3.0 or higher. Agresso 5.3 or higher.

This screen (section) shows the two buttons that are created in the SuperOffice CRM and which operate as direct links into the ERP system

## SuperOffice Solution Provider

SuperOffice assumes no responsibility for products developed by third party, used together with or in connection with SuperOffice CRM 5 software. The solution provider shall identify and hold SuperOffice harmless from third party claims, from the use of SuperOffice products under these terms. SuperOffice warrants the SuperOffice CRM 5 product according to the end user license agreement, only when no changes have been made to the product.
